

Configuring Cardboard

Configuring Cardboard for SSO enables administrators to manage their users using Citrix Gateway. Users can securely log on to Cardboard using their enterprise credentials.

To configure Cardboard for SSO through SAML, follow the steps below:

1. You need to contact the Cardboard support team using support@cardboardit.com.
2. You need to provide the IDP metadata to the Cardboard support team.

The Cardboard support team configures SSO settings and provides you ACS URL and SP-initiated URL.
